There's No Profit In Chaos . . .

G. Keith Funston, President of the New York Stock Exchange, recently answered the old communist cry that American "capitalists" and American big-business are war mongers, for the reason that war means more and more profits and they aren't worried about how much blood is spilled so long as those profits keep coming in a golden stream.

Mr. Funston said, "War is utterly destructive — and business cannot make a profit out of chaos. Can you find a sane businessman who has a good word to say for these by-products of income taxes, price fixing, material shortages, loss of personnel, governmental red tape, and disruption of essential long-range business planning?"

He then dealt with the fact that stock prices declined abruptly at a time when the peace outlook in Korea seemed to brighten. This drop, he observed, "reflected change and the introduction of factors defying immediate measurement . . . The market will always respond to shock treatment." It is a fact of record that the market broke much more severely in mid-1950 when the Korean war started.

The American business community, like all Americans, wants peace and hates war.

Got \$5,800 To Spare? . . .

Our national debt, which now is close to \$263,000,000,000, could be paid off immediately. All that is necessary is for each and every family in this country to donate \$5,874!

Yes — that's correct. Your family's share of our staggering debt is more than \$5,800. That is our heritage from a series of wars coupled with waste and financial recklessness in government. And that's why

HOW LONG CAN HE TAKE IT?

our biggest domestic problem is to cut government costs, to balance the budget, to start reducing the debt as soon as we can, and to reduce the tax burden.

YOUR MILK...

Transportation has turned the impossible into fact. But only the daring can handle the task. It took Columbus three months to discover America, but Lindberg crossed the Atlantic to Paris in thirty-three and a half hours. Just lately it was done in seven hours. In the early days of the West, the pony express was the fastest way to dispatch mail and by stagecoach was the best way to travel. Fifty years ago the train called the Empire Express traveled sixty miles an hour. Today on our highways, thirty million cars do that and more. In the near future, the airplane is going to do everything the automobile is doing now and at a far greater speed. Horse and ox drawn parairie schooners played an important part in setting up our western states and gave us the richest agricultural land in our Nation as well as an untold wealth in minerals. Just last week all of our cows were tuberculin tested and found free of the disease. You can not go wrong buying your milk from Hunter's AuSable Dairy, because it comes from healthy cows. Try some and see for yourself.

MICHIGAN OUTDOORS

PETS FROM THE WILD

In late April, May and June life begins for many new residents everywhere in Michigan Outdoors. Skunks, raccoons, foxes, opossums, squirrels and most other mammals produce their young and expose them to a host of natural enemies not the least of which is man. Between the ages of one and two months almost every animal is irresistibly "cute." It is a natural temptation for man to pick up the youngster of the wilderness and attempt to domesticate it. In many instances the net results may prove disastrous.

Raccoons First Choice

Because of the appealing masked face, and playful antics of a young 'coon this common Michigan animal is most frequently appropriated from its natural wild habitat by man. If the animal is no more than a couple of months old when acquired it is likely to make an interesting pet for the first six or seven months of its life. Its mischievous curiosity is comical to watch, and the native intelligence of this "coon" ranks very high in the animal kingdom.

However, with the coming of winter the raccoon wants less and less attention from man, preferring to curl up in seclusion in a state of partial hibernation. The appetite all but disappears and the animal ceases to offer much attraction as a pet.

In February, as the mating season approaches, the raccoon awakens and becomes restless and petulant. An inborn spirit of independence asserts itself. It may resent handling, and more often than not will "bite the hand that feeds it." And the penetrating power of the fang teeth cannot be overestimated.

Some Remain Docile

While mammal biologists predict this "reversion to the wild" as commonplace, some animals retain a strong affinity for man and remain devoted pets. BUT, your chances of finding such a youngster are extremely slim. Skunks are probably most likely to remain more or less domesticated, but not many people are attracted to their squalid habits.

A fawn taken from the woods can prove itself a dangerous "pet." Razor-sharp hooves have inflicted serious injury to young children.

Conservation Legislation

That's why our Conservation Department discourages wild animal "pets." It's not a matter of saving the species—it is a matter of saving YOU! A permit from the Conservation Department is required if you plan to keep a wild animal as a pet—and be forewarned: such a permit will not be readily given. Wild animals don't belong in back yards. Nature put them in Michigan Outdoors. They're better off living there!

Mont Neff's "Michigan Outdoors" television show can be seen every Thursday over WWJ-TV, Channel 4, in a thrilling full half-hour show—10:00 till 10:30 p.m. DON'T MISS IT!

The Harold Jehns, former residents, now of Battle Creek spent several days here last week.

Ed West of Roscommon is the new meat department manager at the A & P Store, Bud SanCartier having resigned.

Mr. and Mrs. William Schriber of Dearborn are here for the summer and are occupying their home at 905 Park street.

Mrs. Elsie Rasmussen, chairman of the recent annual Poppy sale, sponsored by the American Legion Auxiliary wishes to thank her helpers and the public for their splendid response to the sale. The proceeds of this sale enables the organization to carry on its rehabilitation and welfare programs.

Mr. and Mrs. Rufus Edmonds of Flint spent last week visiting the former's grandmother, Mrs. Pauline Edmonds in Maple Forest and with the William Christiansons at their cabin on the AuSable River.

Mrs. Robert Bovee and Mrs. John Solik spent Tuesday of last week in Petoskey.

Miss Greta Rasmussen is assisting in the office of the Register of Deeds for the summer months. Mrs. Glen Fenton invited in a

number of ladies Wednesday of last week in honor of her sister-in-law, Mrs. Jack Fenton, who left Grayling the following day for Whitehall, Mich., to reside. Mr. Fenton has been there for some time in the interest of the Fen-Par Exploration Company. Those present included Mrs. Tom Robertson, Mrs. Thomas Haugh, Mrs. Carlyle Brown, Mrs. Ted Thompson, Mrs. Fred Lamm, Mrs. U. Hartley Russell, Mrs. Sam Kenyon, Mrs. Carl Richardson and Mrs. J. L. Martin.

Mrs. Glen Fenton and daughters Barbara and Peggy, Mrs. Sam Kenyon and Miss Sylvia Robertson were Traverse callers recently. Mr. and Mrs. Keith Bovee of Frontier, Mich., visited the former's brother Robert and family one day last week enroute to Petoskey to attend the Michigan Methodist church conference. Mr. Bovee, who is a pastor of the Frontier and Cambria churches, graduated on June 7th with a B. A. degree from Adrian College. He will attend seminary college in Chicago for three years before becoming an ordained minister.

Mr. and Mrs. Homer Annis of Beaver Creek enjoyed a visit from their children and families recently. Mr. and Mrs. Cecil Linderman and son Terry of North Charleroi, Pa., spent a week here, while Mr. and Mrs. James Send of Flint, Miss Myra Annis of Midland and Mr. and Mrs. Francis Annis of Lansing spent the week end at the parental home.

Mr. and Mrs. James H. Brown of Mt. Clemens, arrived in time for Father's day and are spending the week, guests of Mrs. Brown's parents, Dr. and Mrs. C. G. Clippert.

Mrs. Edward Skinner of Fredrick and Mrs. Charles Keway of Grayling were the winners of the watches which were given away at the Admiral Freezer demonstration sponsored by Weavers Bottle Gas Co., last Thursday evening. Several other gifts of food were won by many.

Mrs. Herman Doroh and son Frederick have returned to Grayling after spending several months visiting her daughter Mrs. Guy Wheaton and family in Lyons, Michigan.

Rev. and Mrs. Hans Juhl left Saturday for Ludington to attend the 75th anniversary celebration of the Evangelical Lutheran church there. That church was his first call after being ordained and he served as pastor there for several years. Their daughter and husband Mr. and Mrs. Floyd San Cartier accompanied them there and spent the week end.

Miss Anita SanCartier is a new clerk at the Sorenson Sporting Goods store. Ronnie SanCartier is employed at the A & P store for the summer.

Mr. and Mrs. Norval Moran of Clio were week end guests of Mr. and Mrs. Nels Olson.

Mr. and Mrs. Jack Seator and children of Mt. Pleasant spent the week end of the 14th visiting Mrs. A. F. Gierke and the Frank Sarvens. Mr. and Mrs. Gerald Larke also visited at the Gierke home and Mr. Larke went from here to Rogers City to visit his father Fred Larke who was ill. Mr. and Mrs. Fred Larke were former residents of Grayling when the former was care-taker at Hartwick Pines Park.

Mrs. A. F. Gierke and son Earl Mr. and Mrs. Elmer Rasmussen and Mrs. Gierke's sister Mrs. Thomas Maynard of Dexter have returned after a pleasant vacation trip. They visited many historical places in the south among them colonial Williamsburg and Winchester, Virginia. They also spent some time in Norfolk at Virginia Beach, and returning visited Mt. Vernon, and Washington, D. C.

Laurianne Olson, daughter of Mr. and Mrs. Nels Olson, left last Thursday for New York City, where she expects to spend a month, and after that time will go to Bennington, Vermont for a couple of weeks visit. She went by plane to New York from Willow Run. Nels Peter III, the Olson's son left Sunday for Camp Daggett on Walloon Lake for a month.

Mrs. John Hodge and Mrs. Phillips of Detroit stopped in

Grayling the first of the last week and visited Mrs. Wilfred Laurant enroute to the Michigan Nurses convention in Marquette. Both ladies are employed at Ford Hospital in Detroit.

Mrs. George Stephan is visiting her daughter Mrs. George Granger in Big Rapids expecting to be gone for two weeks. Her daughter Mrs. Amos Hunter accompanied her as far as Cadillac Friday, where she was met by Mrs. Granger. Julie Hunter is visiting the Grangers for a month.

Shirley Gowing and son Jay of Midland were Grayling callers Friday.

POWER! PERFORMANCE! AND LOW PRICE!

Drive it and Learn Why Dollar for Dollar You Can't Beat a Pontiac

GENERAL MOTORS LOWEST PRICED RIGHT

Pontiac

PARSONS and LAMM :: Grayling, Michigan

Once you're behind the wheel of a new Pontiac, it's hard to believe it's priced so low.

You thrill to outstanding performance that lets you slip through city traffic or cruise the open road with power to spare.

You relax in roomy, luxurious interiors, and enjoy the satisfaction of driving the most distinctive beauty on the road.

And because it's big and rugged, Pontiac gives you the feeling of road-hugging safety, yet maneuvers so easily that driving is almost effortless.

In fact, there's nothing to suggest that it's priced just a few dollars above the lowest.

Come in soon and prove to yourself that dollar for dollar you can't beat a Pontiac.

Road Commissioners Minutes

A copy was read by Supt. Hull of a letter sent by F. N. Pierce, Director Railroad Service Commission to Grey K. Nelson, Assistant General Attorney of the N. Y. Central Railroad Co. in which it was stated that a recommendation was made that permission be granted to the Crawford County Road Commission to cross the tracks of the N.Y.C.R.R. Co. at Lake Margrethe.

Mr. Eldon Livingston, Earle Equipment Co., appeared before the Commission in the interest of Truck equipment. A trip to Lovells township was made by the Commission accompanied by Supt. Hull to view the work done in connection with laying the Lakehead pipeline Co. Inc. pipeline through Crawford County.

A motion by Johnson that the meeting adjourn until Saturday June 6th at 10:00 A. M. for a special meeting with the Road and Bridge Committee of the Board of Supervisors.

Elmer Corsaut, Chairman
U. Harley Russell, Clerk

A special meeting of the Crawford County Road Commission, together with the Road and Bridge Committee of the Board of Supervisors was held in the C. C. R. Commission office.

Meeting was called to order by Chairman Corsaut.

Present from the C. C. R. Comm. were Corsaut, Richmond and

My Neighbors

By Bill Paulson

"The Kremlin never worries about losing face... they can always use their other one!"

Johnson.

Present from the Road and Bridge Committee, were Roberts, McMillan and Murphy.

A copy of a letter was read by Supt. Hull from F. N. Pierce, Director Railroad Division of the Michigan Public Service Commission to Grey K. Nelson, Assistant General Attorney of the N. Y. Central Railroad Co. in which it was stated that a recommendation was made that permission be granted the Crawford County Road Commission to cross the N.Y.C.R.R. tracks at Lake Margrethe.

After discussion the Commission and the Road and Bridge Committee accompanied by Supt. Hull made a trip of inspection to Lake Margrethe to view the crossing.

After which the Committee returned to their office.

Motion by Corsaut that meeting adjourn until Monday June 8, 1953. Motion carried.

Elmer Corsaut, Chairman
U. Harley Russell, Clerk

LEGAL NOTICES

The following ordinance has been adopted by the Township Board of Grayling Township. Publication of this ordinance hereunder will from this date forward be enforced.

WATER SUPPLY, SEPTIC TANK & DISPOSAL REGULATIONS

By virtue of the power vested in the Township Board of Grayling Township, Crawford County, Michigan, under Act 185 of the Public Acts of 1943, the following ordinance is hereby provided to be in effect within the boundaries of Township 26 North of the Township of Grayling, Crawford County, Michigan, Range 4 West.

Part I - DEFINITIONS

When not inconsistent with the context, words used in the present tense include the future; words in singular number include the plural number, and words in the plural number include the singular number. The word "shall" is always mandatory, and not merely directory. Words and terms not defined herein shall be interpreted in the manner of their common usage.

Section 1. Township Board

For the purpose of these regulations the term Township Board shall mean the members of the Township Board elected by the people of the Township of Grayling.

Section 2. Health Department

For the purpose of these regulations Health Department shall mean the District No. 1 Health Department for the counties of Crawford, Kalamazoo, Muskegon, Roscommon and Westford, or duly constituted authority.

Section 3. Health Officer

For the purpose of these regulations the term Health Officer shall mean the Director of the District No. 1 Health Department and/or his authorized representative. (Mr. John McMillan is hereby designated Health Officer, whose address is M-93, Lake Mar-

Section 4. Dwelling

For the purpose of these regulations a dwelling shall mean any house, building, structure, tent, shelter, trailer, or vehicle, or portion thereof (except railroad cars or tracks or right-of-way) which is occupied in whole or in part as a home, residence, living or sleeping place for one or more human beings.

Section 5. Habitable Building

For the purpose of these regulations the term habitable building shall mean any building where human beings reside, are employed, or congregate.

Section 6. Premise

For the purpose of these regulations the term premise shall mean any dwelling, building, or other place where human beings reside, are employed, or congregate.

Section 7. Person

For the purpose of these regulations the term person shall mean person, persons, partnership, firm, or corporation responsible for the ownership or operation of a premise.

Section 8. Definitions

For the purpose of these regulations the term premise shall mean any dwelling, building, or other place where human beings reside, are employed, or congregate.

Part II - SEWAGE AND EXCRETA DISPOSAL

Section 1. Definitions

Item 1. Automatic siphon—An automatic siphon is a mechanical device which will automatically cause a liquid entering a receptacle to be retained until a predetermined high water level has been attained after which it is automatically released from the receptacle until a second predetermined level has been reached at which time the flow from such receptacle ceases until the high water level has again been attained.

Item 2. Cesspool

A cesspool is a cistern or underground enclosure constructed of loosely laid concrete blocks or brick or similar material which receives sewage which has not passed through a septic tank.

Item 3. Dosing Chamber

A dosing chamber is a watertight tank or receptacle used for the purpose of retaining the overflow or effluent from a septic tank, pending its automatic discharge to a selected point.

Item 4. Seepage Pit

A seepage pit or dry well is a cistern or underground enclosure connected to the outlet of a septic tank and constructed of concrete blocks, bricks, or similar material loosely laid with open joints so as to allow the septic tank overflow or effluent to be absorbed directly into the surrounding soil.

Item 5. Septic Tank

A septic tank is a watertight receptacle having an inlet and outlet receiving liquid wastes and so designed to permit the separation of solids in suspension from such wastes and to permit such retained solids to undergo decomposition therein.

Item 6. Sewage

Sewage is a combination of the domestic liquid wastes conducted away from residences, business buildings and institutions.

Item 7. Sewage Disposal Facilities

Sewage disposal facilities shall mean a privy, cesspool, dry well, flush toilet, sewer pipe, septic tank, sub-surface disposal system, or similar device used in the disposal of sewage or human excreta.

Item 8. Sewer

A sewer is a covered conduit for carrying off sewage.

Item 9. Sub-Surface Disposal Field

A sub-surface disposal field is a means of distributing septic tank overflow or effluent below the ground surface by means of a line or series of branch lines of drain tile laid with open joints so as to allow the overflow or effluent to be absorbed by the surrounding soil.

Item 10. Toilet Devices

A toilet device is a privy or out-house; septic tank privy, or septic toilet, chemical closet, and other similar devices used for the disposal of human excreta.

Section 2. Sewage and Excreta Disposal for any Premise

It shall be unlawful for any person to construct or maintain any premise which is not equipped with adequate facilities for the disposal in a sanitary manner of sewage. Such facilities shall be constructed in accordance with the provisions of these regulations. Under no conditions may the sewage from an existing or hereafter constructed premise be deposited on the surface of the ground.

Section 3. Construction and Maintenance of Privies and Similar Toilet Devices

All privies and other toilet devices shall be constructed and maintained in accordance with the regulations adopted by the State Council of Health June 6, 1940, entitled: "Regulation Pertaining to the Construction and Maintenance of Out-houses and to Safeguard the Public Health by Preventing the Spread of Disease and the Existence of Sources of Contamination in Accordance with Act No. 273, Public Acts of 1939."

Section 4. Requirements for the Construction and Maintenance of Water-Carried Sewage Disposal Facilities

Item 1. Methods of Water-Carried Sewage Disposal.

Where a sewer is not available for public use, all facilities hereafter installed such as flush toilets, urinals, lavatories, sinks, bathtubs, showers and any similar fixtures used to receive or conduct water-carried wastes shall be connected to a septic tank or to some other device approved by these regulations in a manner approved by the District Health Department No. 1; provided that such facilities existing at the time these regulations are adopted, which may become or are a nuisance or menace to the public health in the opinion of the Health Officer, shall be connected to a septic tank or to some

other device approved by these regulations. Final disposal of sewage shall be in a manner approved by these regulations and the District Health Department No. 1.

Item 2. Sewers

(a) Type and location—Sewers from a dwelling or habitable building shall be constructed of cast iron, vitrified clay or other approved sewer pipe with leaded or cement joints. Any unapproved pipe carrying sewage or any pipe through which sewage may back up shall be located more than twenty feet from a well, spring or water suction line, and when such a pipe is between 20 and 50 feet from a well, spring, or water suction line, it shall be constructed of cast iron soil pipe with leaded joints tested for water tightness. When such a pipe is exposed and accessible for inspection, it may be allowed within twenty feet, but not less than ten feet from a well, spring, or water suction line. All sewers four inches or more in diameter within one dwelling or habitable building and to a point five feet outside of the foundation shall be of cast iron pipe equipped with proper clean-outs.

(b) Size. Sewers shall not be less than four inches in diameter.

(c) Grade. Sewer pipe prior to the connection to a septic tank shall be laid at a grade of not less than twelve inches per one hundred feet.

Item 3. Septic Tanks

(a) Location. Septic tanks shall be located at least fifty feet from any well, spring, or water suction line. No septic tank shall be located where it is inaccessible for cleaning or inspection purposes, nor shall any structure be placed over any existing septic tanks making the same inaccessible for cleaning or inspection purposes.

(b) Capacity, Proportions, and Materials. Every septic tank shall have a capacity of at least the average volume of sewage flowing into it during the period of twenty-four hours, but in no case less than five hundred gallons. A tank shall have a depth of at least fifty inches, and the inside construction shall be of one compartment at least five feet in length with no dividing partition. Septic tanks shall be of watertight construction and of material not subject to corrosion or decay.

(c) Manholes. Every septic tank shall be provided with one or more suitable openings with covers to permit inspection and cleaning.

(d) Inlets and Outlets. The bottom of the inlet line to the septic tank measured from the top of the tank shall have a depth of at least two inches above the bottom of the outlet line where it passes through the wall of the tank. The outlet shall be constructed to permit the withdrawal of liquid from the middle third of the depth of the liquid in the tank. The outlet shall also permit the interchange of gas above the liquid level in the tank and in the disposal line. The inlet must be designed to permit gas above the liquid level to escape through the inlet and out a vent pipe serving the line leading to the tank.

(e) Dosing chambers and automatic siphons. Dosing chambers equipped with automatic siphons of the type approved by the Michigan Department of Health shall be used in all installations where the liquid capacity of the septic tank is over one thousand gallons and where the topography is suitable.

Item 5. Disposal Field

(a) Location. Sub-surface disposal fields shall be located at least fifty feet from any well, spring, or water suction line except where Part II, Sec. II of these regulations require a greater distance.

(b) Dimensions of Tile Trenches. The tile trenches shall be at least eighteen inches wide, shall be from twelve inches to twenty-four inches deep, and shall have a maximum length of any one lateral not exceeding one hundred feet. The tile lines of the disposal field shall have a capacity equal to one-fifth of the total capacity of the septic tank, or to one discharge from the dosing chamber.

(c) Tile Lines. The tile lines of the disposal fields shall be laid on a grade of not more than three inches per one hundred feet, and parallel lines shall be at least two feet apart. The tile line shall be surrounded by gravel or broken stone, extending at least three inches below the tile and the full width of the trench.

(d) Seepage Pits. When conditions are not suitable for the installation of a disposal field, a seepage pit may be approved by the Health Officer. A special permit for the construction of a seepage pit shall be received before such construction is started.

(e) Cesspools. Under certain conditions, a cesspool may be approved by the Health Officer, if, in his opinion, it will not constitute a potential menace to the public health. A special permit for construction of a cesspool shall be issued before such construction is started.

Section 5. Inspection and Approval

Item 1. Notice to Health Department. Before construction is started on any septic tank or disposal field, plans, or a sketch of such construction shall be filed with the person designated by the Township Board or the owner or person engaged for such construction, and no construction shall start on the proposed installation until a written permit for same shall have been received from the Health Officer or designated representative.

Part III - CONSTRUCTION AND MAINTENANCE OF PRIVIES AND SIMILAR TOILET DEVICES

Item 1. All privies and other toilet devices shall be constructed and maintained in accordance with regulations adopted by the State Council of Health June 6, 1940 entitled "A Regulation Per-

taining to the Construction and Maintenance of Out-houses and to Safeguard the Public Health by Preventing the Spread of Diseases and the Existence of Sources of Contamination in Accordance with Act No. 273, Public Acts of Michigan, 1939."

Item 2. No privy shall be constructed on or moved to any premises except by special permission of the Health Officer. The permit shall be obtained from the person designated by the Township Board.

PART IV - WATER SUPPLIES

Section 1. Definitions

Item 1. Approved water supply—An approved water supply is one which meets the requirements of these regulations.

Item 2. Auxiliary Intake—An auxiliary intake is any piping connection or other device whereby water may be secured from a source or location other than that normally used.

Item 3. Cross-connection—A cross-connection is any physical connection or plumbing arrangement whereby an approved water supply system is connected with any other water supply system whether public or private either inside or outside of any building.

Item 4. Interconnection—An interconnection is any system of piping or other arrangement whereby a public or private water supply system is connected directly with a sewer, drain, conduit, swimming pool, storage reservoir, or similar device which contains or may contain sewage or other wastes or liquid capable of imparting contamination to an approved water supply.

Item 5. A private water supply is any water supply not defined as a "Public and Semi-Public Water Supply" of the regulations.

Item 6. Public and Semi-Public Water Supply—A public and semi-public water supply is any water supply offered to or available to the public or any water supply used on any premise in a manner where the use of a contaminated water supply might constitute a menace to the public health. The definition shall not include municipal supplies for cities and villages.

Section 2. Public and Semi-Public Water Supplies

All public and semi-public water supplies shall be located, constructed, and maintained in accordance with the regulations adopted by the State Council of Health, September 18, 1941, and amended on April 24, 1947, entitled: "A Regulation on Minimum Standards for the Location and Construction of Wells Used for the Production of Untreated Public and Semi-Public Water Supplies, Other than Municipal Supplies."

Section 3. Private Water Supplies

Private water supplies hereinafter constructed shall comply with the following requirements:

Item 1. Location—All wells, springs, water suction lines, and other drinking water structures, shall be located at least fifty feet from seepage pits, cesspools, privies, septic tanks, sub-surface disposal systems, county drains and other sources of contamination. Buried or unexposed sewers or pipes through which sewage may back up, shall be located at least ten feet from any well or suction pipe. When such sewers or pipes are located within ten to fifty feet area, they shall be constructed of cast iron soil pipe or cast iron water pipe with leaded joints, tested for water tightness. All wells shall be located so that possibilities of flooding are reduced to a minimum. The area immediately adjacent to the well shall be mounded up so that the surface water is diverted away from the well.

Item 2. Minimum Depth—All wells shall be at least twenty-five feet in depth.

Item 3. Platform and Cover—A hand pump installations, the well top or platform shall be a water-tight reinforced concrete slab of a minimum thickness of four inches, extending at least two feet from the well casing in all directions. The slab shall rest on compact earth or concrete, and shall be sloped from the well casing to the edges of the slab.

Item 4. Pits and Pump Rooms—Well heads, tops of casings, pumps, pumping machinery, or suction pipes shall not be located in any pit, room, or space extending below the ground level, or in any room or space above ground which is walled in or otherwise enclosed, unless it has free drainage by gravity. Such drain shall discharge above the highest known flood stage or to a gravel pocket above the highest known ground water level, and be protected from sources of possible contamination. No such drain shall be connected to a septic tank, sewer, or any pipe through which sewage may back up. All seep-holes shall be at a point at least one foot above the floor of the well pit.

Well pits shall be constructed with concrete floor and walls and covered with an over-lapping, tight fitting platform provided with proper manhole.

Item 5. Power Pump Room Floors—Every power pump room floor shall be water-tight. Pump room floors when above ground shall be at least six inches above the ground surface and shall slope outside edges and shall slope away from the pump and well casing.

Item 6. Suction Pipes—Suction pipes when placed underground shall be at least two feet above the maximum ground water table.

Item 7. Casings—The casing of tubular wells shall be of at least standard weight iron pipe, water-tight throughout its length, and the joints shall be treated. The casing or wall of a dug or bored well shall be watertight for a distance of at least ten feet below the ground surface. The casing of all tubular wells shall extend at least one inch above the top surface of the platform, floor, or pedestal.

Item 8. Hand Pumps—Hand pumps shall be designed to ex-

clude all contamination and shall have a closed pump spout directed downward.

Item 9. Power Pumps—Power pumps shall be designed and so fastened to the casing as to exclude all contamination. All air relief vents shall be screened and protected against the possibility of contaminating material entering the vent. The open end of the vent shall be at least two feet above the floor. Metal or plastic tubing shall be used for vents, waste and lubricating water, and water level gauges.

Item 10. General requirements

Water used for cooling parts of engines, air compressors, pumps, and other equipment shall not be returned to any part of the water system. Storage reservoirs shall be water-tight and constructed so as to prevent the entrance of birds, insects, or other animals. Overflow pipes from reservoirs shall not be directly connected to any sewer or pipe through which sewage may back up.

Section 4. Connection with Unsafe Water Sources

There shall be no cross-connection, auxiliary intake, by-pass, interconnection or other arrangement including overhead leakage, whereby unsafe waters, or water from a source that does not comply with these regulations, may be discharged or drawn into any supply used for drinking or other domestic purposes.

Section 5. Approval Requirements

Item 1. Notice to Health Department. Before construction is started on any semi-public or private water supply, plans or sketch as to location of well, pump and septic tank, privy or disposal field shall be filed with the person designated by the Township Board by the owner or person engaged for such construction, and no construction shall start on the proposed installation until a written permit for same shall have been received from the Township Board, or its Health Officer.

Item 2. When a water supply is to be installed, the existence of any structure or condition liable to the enactment of these regulations prevents full compliance with Part III, Section 3, of these regulations, the Health Officer may approve in writing certain exceptions which, in his opinion, would not constitute a potential menace to the public health.

Item 3. Approval Requirements

After the construction has been completed and before any sewer, septic tank, septic toilet, chemical closet, seepage pit or disposal field has been covered and placed in operation, the Health Department shall be notified. Written approval shall be given by the Health Officer when such construction meets all the requirements of these regulations.

Section 6. Abandonment of Wells

Any water supply which has been condemned by the Health Officer or abandoned by the owner shall be filled in, or otherwise treated, to protect the water bearing formation against contamination. Definite instructions regarding such abandonment shall be made to the property owner by the Health Officer.

Section 7. Outlets from Unsanitary Water Supplies

All outlets from water sources which do not comply with these regulations shall be sealed, or at the discretion of the Health Officer, be provided with a permanent and easily readable tag or label reading "This Water Unsafe for Drinking." Removal of said label or tag, except by permission of the Health Officer, shall be deemed a violation of these regulations.

Section 8. Drinking Fountains

All drinking fountains hereafter installed shall be of the angle jet type and constructed of impervious materials. The orifice shall be above the overflow rim of the fixture and shall be so protected as to prevent contamination by users. There shall be free drainage away from the orifice. All fountains shall be kept clean and in good shape.

PART V - AMENDMENTS

The Township Board of Grayling Township, Crawford County, Michigan, may from time to time amend, supplement, or change these regulations.

PART VI - VALIDITY

These regulations and the various parts, sections, and clauses thereof, are hereby declared to be severable. If any part, sentence, paragraph, section, or clause is adjudged unconstitutional or invalid, it is hereby provided that the remainder of these regulations shall not be affected thereby.

PART VII - CONFLICTING REGULATIONS

Where any of the provisions of these regulations and the provisions of any other local or state ordinances or regulations apply the more restrictive provisions of any or all ordinances and regulations shall prevail.

PART VIII - ENFORCEMENT

It shall be the duty of the Health Officer or his authorized representative to enforce these regulations.

PART IX - ABATEMENT OF NUISANCES

Nothing stated in these regulations may be construed to limit the power of the Township Board to order the immediate and complete abatement of a public health nuisance or a menace to public health or of a condition which in the opinion of the Township Board may become a menace to public health.

PART X - PENALTIES

If any person shall violate the provisions of these regulations or any part thereof, he shall be deemed guilty of a misdemeanor and on conviction thereof shall be punished by a fine not exceeding the sum of one hundred dollars, or by imprisonment in the county jail not exceeding ninety days, or both such fine and imprisonment in the discretion of the court.

PART XI - EFFECTIVE DATE

These regulations shall be deemed to be in effect on and after June 1st, 1953.

Dance Revue Well Attended

A good size crowd attended the dance revue entitled "Stars of Tomorrow" that was presented at the Grayling High School auditorium Wednesday evening of last week. It was given by members of the dance class of Mrs. Lucille Fritz of Gaylord and there was a varied program of dances and all numbers were well received. There were many on the program from Grayling together with those from Grayling, Mrs. C. G. Clippert was the pianist and the Grayling Kiwanis Club sponsored the affair.

Those from Grayling who took part gave a very creditable performance for the short time which they have been taking dancing lessons which is just the past school year. However Mrs. Fritz had many of her class from other towns, who had had a lot more training which showed what could be accomplished. This was especially true of the dance teams of Patty Davis of Frederic and Sue Fox of Gaylord and Loretta Schroeder of Gaylord and Marlene Thompson of Alanson. They showed excellent training for they performed to perfection. Several numbers in which they appeared were solo dances and these were given beautifully.

At the finale the entire cast appeared and sang "God Bless America" and the audience was invited to join in the singing. At this time Mrs. Fritz was presented with a bouquet of yellow roses as a gift of appreciation from the Grayling members of her class, and little Sally Gould and Janet LaGrow made the presentation. There were many people from Grayling and other places in the audience.

Attend Bon Voyage Party

Mr. and Mrs. Anton Kangas of Grayling were guests at a Bon Voyage party in Lewiston, Michigan, in honor of their niece, Irene Pynnönen. Irene is leaving for Europe on the M. S. Georgic on June 24th. She will take a conducted tour of England and the continent and an extended tour into the Scandinavian countries and Finland. She will visit Mrs. Kangas' home. Mrs. Kangas is a sister of her late father, Jonas Pynnönen.

About thirty relatives and friends were present at the party. People were present from Elsie, East Lansing, Birmingham, Detroit and Grayling.

Irene is a graduate of Grayling High School and a member of the Traverse City Public School faculty.

Prune Pines Now, Shape For Xmas

If you're growing pines for Christmas trees, this is a good time to trim them-up through the first week of July.

That's a tip from Extension Forester William G. Stump of Michigan State College. Pine trees usually grow "too fast" and leave too much space between whorls of lateral branches, he says. Pruning will help give a compact tree with the right height.

All you need to do the job, he advises, are a pair of hedge shears and a jackknife. Cut back the terminal growth at the top of the tree to control the height growth. Then cut back the lateral growth of the terminal whorl so they are an inch or two shorter than the terminal growth.

Next come the lateral branches on the remainder of the tree. Some of these may be growing too rapidly and will have to be pruned in order to give the tree a conical outline. Occasionally, Stump suggests, it may be necessary to remove some old growth in order to shape the tree.

Details on pruning can be obtained in a publication called "The Pruning of Red and Scotch Pine for Christmas Trees". It's available at the county agricultural agent's office or by writing to the Extension Forestry Department, Michigan State College, East Lansing.

SPIKE'S KEG O' NAILS

Pay more? What for?

Fifty Years Forward on the American Road

You don't have to pay costly-car prices for costly-car comforts. Ford brings you everything [and we mean everything] you've ever wanted in a car, at a price that's well within your reach! And according to recent surveys, a Ford returns more of its original cost when sold than any other car at any price!

Here are a few of the "Worth More" advantages you'll find in the '53 Ford:

1. A V-8 engine—powerful and smooth! Ford's famous high-compression V-8 is a leader in quiet, flexible, economical performance. Ford, remember, has built more V-8's than all other makers combined—over 15 million!

2. America's most economical Six engine! If it's a Six you want, Ford offers you the high-compression, low-friction Mileage Maker... the engine which, with optional Overdrive, won over all other cars, regardless of size or weight, in this year's Mobilgas Economy Run! And it's yours for the same kind of money that buys less modern sixes in other cars.

3. America's finest and most versatile automatic drive! Fordomatic Drive is the "automatic" which gives you both the get-up-and-go of automatic gears and the smoothness of a fluid torque converter. If you choose Fordomatic, you will find that it makes all your driving easier... more relaxing.

4. Automatic gas savings! Ford's Automatic Power Pilot (on Six and V-8) meters just the right amount of gas, times ignition precisely, burns fuel evenly and completely. You get full high-compression performance from every drop of gas—regular or premium.

5. America's newest and finest power steering! Ford's Master-Guide power steering gives you new ease, stability and safety in guiding your car on smooth roads or rough. Your car gains in sure-footed roadability and you expend up to 75% less effort in driving—and parking.

6. Largest choice of models in the low-price field!

Ford alone gives you a choice of 18 different models... a SIX or V-8... Fordomatic, Conventional or Overdrive... the widest variety of body, color and upholstery combinations. You can practically "design" your own Ford!

7. A body that's the style-setter!

Only Ford in its field gives you the advantages of a hull-tight Crestmark Body... the trend-maker in design and beauty. Ford's body is the longest and Ford's trunk, the largest. You enjoy more usable space.

8. New driving conveniences!

Ford's first in its field with such "Worth More" features as easier-acting, suspended pedals that eliminate floor holes... foam rubber cushions on front and rear seats in all models... and convenient Center-Fill Fueling.

9. An automatically controlled ride!

When you Test Drive this Ford, notice how the wide front tread (widest in the low-price field) takes tilt out of turns... gives you a more level ride. With new "balanced suspension," new spring and shock absorber action and new rubber compression bumpers, road shock in the front end alone is reduced up to 80%.

10. It's worth more when you sell it!

An impartial survey of used car prices proved that Fords return a greater proportion of their original cost than any other cars in America. It's another fact to add to Ford's reputation as the "Worth More" car. But don't take our word for it. Stop in and Test Drive this Ford for yourself. We predict you'll be sold before you're in second! It was true last year and it's even truer this year: you can pay more, but you can't buy better than Ford.

WORTH MORE WHEN YOU BUY IT...

WORTH MORE WHEN YOU SELL IT...

LEGAL NOTICES

NOTICE OF MORTGAGE SALE

Default having been made in the conditions of a certain mortgage made by George G. Hanners and Margaret W. Hanners, his wife, of Detroit, Wayne County, Michigan, Mortgages, to Philip D. Dexter, of the same place, Mortgagee, dated the 7th day of May, 1951, and recorded in the office of the Register of Deeds for the County of Crawford, and State of Michigan, on the 9th day of May, 1951, in Liber Q of Mortgages, on page 79-80, which said mortgage was thereafter on to-wit, the 12th day of June, A. D., 1951, assigned to Caroline Greiz and Walter B. Rensel, and recorded on the 13th day of June, A. D., 1951 in the office of the Register of Deeds for said County of Crawford in Liber Q of Mortgages, on page 81, on which Mortgage there is claimed to be due at the date of this notice, for principal and interest, the sum of Ten Thousand, Three Hundred Seventy-five and 71/100 (10,375.71) dollars, and the further sum of Seventy-five (\$75.00) Dollars, as Attorneys' fees, making the whole amount claimed to be due at the date of this notice, to-wit, the sum of Ten Thousand, Four Hundred Fifty and 71/100 (\$10,450.71) dollars, to which amount will be added at the time of sale all taxes and insurance that may be paid by the said Mortgagee between the date of this notice and the time of said sale, and no proceedings at law having been instituted to recover the debt now remaining secured by said Mortgage, or any part thereof, whereby the power of sale contained in said Mortgage has become operative;

Now Therefore, Notice is Hereby Given that by virtue of the power of sale contained in said Mortgage and in pursuance of the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises therein described or so much thereof as may be necessary, at public auction, to the highest bidder, at the front door of the Court House in the City of Grayling, and County of Crawford, Michigan, that being the place for holding the Circuit Court in and for said County, on Friday, the 4th day of September, 1953, at 12 o'clock noon, Eastern Standard Time of said day, and said premises will be sold to pay the amount so as aforesaid then due on said Mortgage together with seven per cent interest, legal costs, Attorneys' fees and also any taxes and insurance that said Mortgagee does pay on or prior to the date of said sale; which said premises are described in said Mortgage as follows, to-wit:

Land in Grayling Township, Crawford County, Michigan, described as: Commencing at a point, being the West line of the Southwest 1/4 of Northwest 1/4 of

Maps Prove Railroad Worth

Maps outlining the economic value of the railroads to Michigan and to each of the 83 counties are being distributed by the Railroad Co-operative League of Michigan, an organization of railroad employees.

The railroads, the maps indicate, are the state's third largest industry and taxpayer. They operate in all but three counties though their taxes go into those counties through the State Primary School Interest Fund.

The importance to Crawford County of the railroad as a transit agency, as an employer and as a highly important payer of wages and taxes is indicated by the figures for this county: Employees, 29; payroll, \$74,642.00; miles of track, 41; and taxes, \$4,848.48; all of which, by constitutional provision, go into Crawford County's school system.

Will there be a Cherry Queen in '53?

EVERYONE LIKES to see a pretty girl and we hope there'll always be a Cherry Queen in Michigan. We see no reason why there shouldn't, for thanks to trucks Michigan's cherry industry has grown into a tremendous business—and still continues to grow.

The cherry industry depends on trucks because trucks get the fruit to canneries and to market faster and in better condition. All of Michigan's cherry crop moves from orchard to cannery by truck—and from 50 to 75% of all the other fruit raised in Michigan likewise depends on motor transport to get to market.

We're sure there'll be a Cherry Queen in '53—and every year thereafter—for, with trucks on the job the cherry industry is bound to continue to grow and prosper.

If you've got it, a truck brought it!

Michigan Trucking Association

Hotel-Fort Shelby

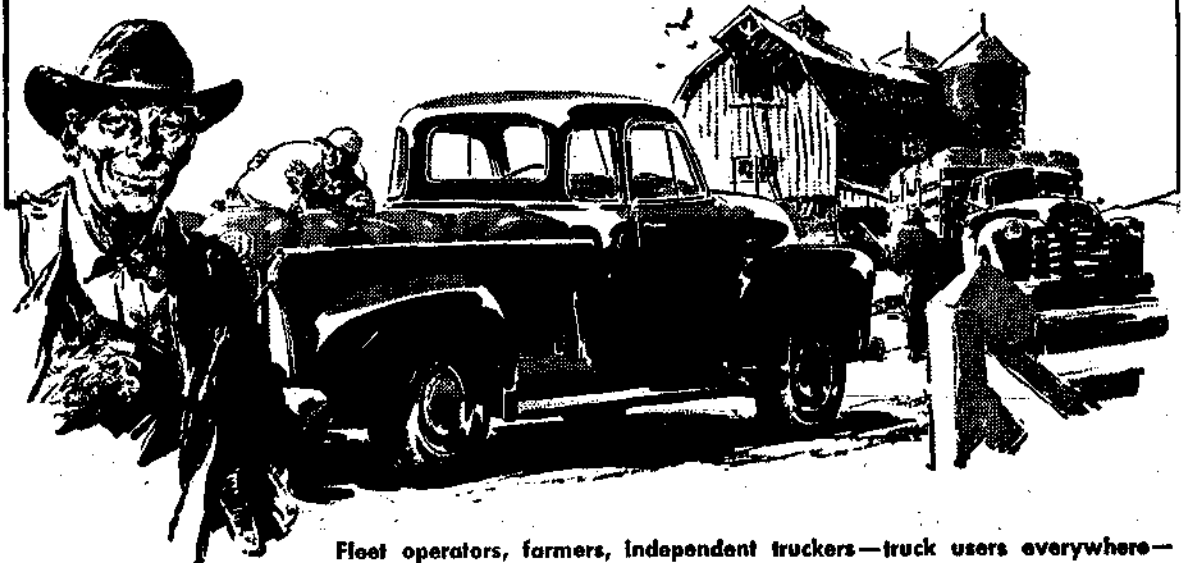

Detroit

TRUCKS ARE YOUR FRIENDS—Serving You NIGHT AND DAY!

There's only one answer...

Chevrolet trucks must be the best buy!

Fleet operators, farmers, independent truckers—truck users everywhere—buy more Chevrolets than any other make. There can be only one reason for that: Chevrolet trucks offer more of what you want.

As the official registration figures keep rolling in, they keep telling the same positive story about truck popularity and truck value: Again in 1953, for the twelfth straight production year, truck buyers show a clear-cut and decisive preference for Chevrolet trucks. If you're a truck user, this fact is mighty

important to you. Why? Well, as you know, trucks are built and bought for just one reason—to do a job. So isn't it logical then that since Chevrolet trucks outsell all others, they must do a better job at lower cost? That's why it will pay you to stop in and see us before you buy your next truck.

MORE CHEVROLET TRUCKS IN USE THAN ANY OTHER MAKE!

Bits O' Talk

Ten friends of Arlene Mae Smith, daughter of Mr. and Mrs. Roy Smith, gathered at her home, Tuesday, June 16th, to help her celebrate her birthday. Games were played and a nice lunch

served. Arlene received many nice gifts. Miss Donna Carlson of Sparrow Hospital, Lansing is spending the week with her grand-parents, Mr. and Mrs. A. E. Hendrickson. John Bruun was in Lansing for a few days this week on business. Herbert Wheeler who is stationed in Philadelphia, Pa., with the Navy was home recently and his

wife and children accompanied him back.

Miss Anna Nielsen, Miss Mabel Richmond and Mr. and Mrs. Peter DeBoer, all of Grand Rapids were weekend guests of the Misses Margrethe and Olga Nielsen. Word has been received here telling of the death on Sunday of Orson Corwin, a former resident of Grayling at his home in Belleville, Mich. Mr. Corwin during his residence here operated a draying business. He is survived by one daughter, Mrs. Florence Tomlinson of Garden City and three sons, George of Belleville, Jay of Bryon, Ohio and Emerson at home. Also two sisters and two brothers. Mrs. Celia Granger, Mrs. Mary Biggs, Charles and Nelson Corwin of Grayling. There are also seven grandchildren and four great grandchildren. Mr. Corwin was the son of the late Amos D. and Sarah Corwin, early pioneers of Crawford County. Incidentally the family farm home was where the Charles Corwin farm now is located.

To our policy holders—Check your fire policies. Call us if you are not sure you are protected against damage from wind or hail which covers tornado damage. Palmer Insurance Agency, phone 3391.

Mr. and Mrs. Arnold Gahler and four sons of Flint are spending the week here at the David Montour home, the former coming to do some fishing.

Mr. and Mrs. Ervin Samsel and three children of Milan spent a day here the last of the week calling on Mrs. Henry Bousson and family.

R. J. Sheehy was home from Waterford, Mich. for over Father's Day.

Mrs. Maxine Wolfe of Port Huron and her son Max Curtis, wife and three children of Salt Lake City, Utah visited Mrs. Laura McLeod a couple of days last week.

Mrs. John Sojka accompanied Mr. Sojka to their home in Centerline, Sunday after spending a month here visiting her mother Mrs. Ernest Borchers. She had

remained here to recuperate from an operation she underwent at Mercy Hospital.

Kenneth McLeod began his duties for the summer season as Chef at the Grand Hotel at Mackinac Island.

Mr. and Mrs. Arthur Crouch of Lake Margrethe are on vacation touring some of the southern states.

Fresh and cold meats, produce, Swift's Ice Cream, ice cold beer to take out. Cottage In Grocery, Lake Margrethe.

Mrs. Carl Schmidt, son Paul and daughters Marie and Mary Ellen enjoyed their cottage at Lake Margrethe over the week end.

Bill Evans and family of Mio visited at the home of the E. J. Birdsalls Saturday. On Friday the Birdsalls were in Traverse City.

Edward Mason of New Orleans, La., and Frederick of Detroit visited their mother Mrs. E. A. Mason at Lake Margrethe.

Mr. and Mrs. Charles Wilbur visited from Saturday to Monday in Whittemore. Their daughter Mrs. Lee Campbell came to accompany them and brought them back home.

Miss Shirley Souders is home from her nursing studies at Harper Hospital, Detroit for a couple of weeks vacation visiting her parents, Mr. and Mrs. Harry Souders.

Miss Christine Sales came home from M. S. C. Wednesday of last week for the summer vacation. Misses Joan Bond and Barbara Nelson who are also students there came home Friday.

Mr. and Mrs. Leo Jorgenson attended the Upper Peninsula annual convention of the American Legion and Auxiliary in Menominee Saturday. It was a one day meeting with a luncheon and a parade. They spent Sunday at the Soo.

Mr. and Mrs. Stanley Flower spent Sunday in Alger and later visited at the Tawases and Osoda.

Mrs. William Powell of Lake Margrethe enjoyed a visit from her son Gerald, who was here from California for a week.

The Irwin Ray family of Bay City were in Grayling Sunday visiting the Barton Wakeley family, coming to get their car that was in a local garage for repairs.

Mrs. Eugene H. Baker of Glendale, Calif. is visiting her parents, Mr. and Mrs. Nelson Corwin at the home of Mr. and Mrs. Menno Corwin. She was accompanied here by her sister, Miss Ruth Corwin, who has been spending the week in California.

Had it not been for the very fine response of the City Fire Department Sunday at 12:15 p. m. there might have been heavier loss to the property of DeVere Benware. The building, occupied as a garage and play house for their children was destroyed in less time than it takes to say it almost. It was the opinion that the fire was caused from spontaneous combustion. It was discovered by neighbors just in the nick of time for Mr. Benware to back out the Union Telephone Service truck from the garage. The loss is estimated to be \$600. Sides of both the Benware and the Herbert Olson home were blistered by the blaze.

The Robert Hansons have purchased a home on the "old lake road" from the Carl Leslies.

Mrs. Arthur Allen and son Terry spent two weeks in Viroqua Wisconsin visiting her parents, Mr. and Mrs. Ole Volden, while there she attended the wedding of her sister, Mr. Allen spent a week in Viroqua stopping enroute in Manitowish a few days to visit his parents, Mr. and Mrs. Arthur L. Allen.

Mr. and Mrs. Clark Rockefeller of Grand Rapids spent several days the past week end visiting their daughter and husband, Mr. and Mrs. Vic Hull.

Week end guests of the Willard Cornells were Col. and Mrs. Howard Derby of Charlotte.
